Product Types

Solace PubSub+: A family of message brokers that is comprised of Solace PubSub+ appliance, Solace PubSub+ software message broker, and Solace PubSub+ Cloud.

Solace PubSub+ appliance: Purpose-built hardware offerings of Solace PubSub+. The appliance includes SolOS – a software package of operating system, firmware and associated environment and executables that runs on the appliance.

Solace PubSub+ software message broker: Software offerings of Solace PubSub+.

Solace PubSub+ Cloud: Messaging-as-a-Service offerings of Solace PubSub+ that run on a variety of public clouds.

Supporting Software Products: Solace also distributes a number of supporting software products that are not members of the Solace PubSub+ family of products. These include, but are not limited to, SolCache, Solace Message Cache, SolAdmin, Solace Geneos Agent, HybridEdge and the Solace Messaging Application Programming Interfaces (APIs).

Definitions

Business Day: Monday to Friday.

Business Hours: 9:00 AM to 5:00 PM.

Enhancement: A non-binding request to Solace for a product improvement.

Hardware: The Solace PubSub+ appliance and any of its tangible components that are field replaceable, e.g., blades.

Initial Response Time: The length of time between initial contact with Solace Support and response from a Solace Support engineer acknowledging receipt of the issue. For Severity 1 or Severity 2 issues, contact must be by telephone in order to measure Initial Response Time.

On-Site Response Time: The length of time between when Solace Support determines a visit by a technician is necessary to the time when the technician arrives on site at the customer. On-Site Response Time applies only to the On-Site Field Repair Service provided under the Platinum+ Support Plan.

Severity 1 Issue: A critical error in a production system. Your service is down, or business operations are critically impacted. There is no known workaround.

Severity 2 Issue: A system defect that is either a critical error for which a workaround exists or a non-critical error that significantly affects functionality of a Solace product.

Severity 3 Issue: An isolated or benign error which does not significantly affect the functionality of a Solace product. It disables only certain non-essential functions and does not materially impact system performance.

Severity 4 Issue: An information request, documentation issue or assistance with product functionality, installation or configuration. There is no impact to business operations.

General Support Plan Information

Term of Service

The term of each support plan is 12 months.

You can renew your support plan before it expires for an additional 12-month term and can continue to renew your plan this way until your Solace product reaches its Final Support Renewal milestone in the Solace Product Lifecycle, after which you can buy one last 12-month term.

If you purchase additional Solace products with associated support plans, you can arrange with Solace for an initial term of less than 12 months so that all your plans expire on the same date.

If your support plan has lapsed, you will need to pay all back support from the date your plan lapsed plus, if applicable, the current year's support to renew the plan.

Issue Escalation

You may increase an issue's severity level if you think the current one is inappropriate by contacting Solace Support. Escalations to Severity 1 or 2 must be followed up with a telephone call to ensure a timely response.

Support Duration for Release Versions

Version Numbers for SolOS & Software Message Brokers

SolOS and the Solace PubSub+ software message broker have version numbers of the form A.B.C.D. For example, 8.10.0.791 is a correctly formatted version number.

A and B, the first and second components, are updated for Major releases, which provide new functionality and maintenance fixes.

C, the third component, is updated for Maintenance releases, which provide maintenance fixes and minor additional functionality.

D, the fourth component, is updated for Hotfix releases, which provide fixes for one or more critical issues.

New features introduced as part of a major SolOS release may not be supported on all Solace PubSub+ appliances and may require the purchase of a software license.

Solace PubSub+

Major releases of Solace PubSub+ are supported for 3 years from the date of their first General Availability release.

Solace APIs

Major releases of APIs are supported for 4 years from the date of their first General Availability release.

Supporting Software Products

Major releases of software products other than those within Solace PubSub+ and Solace APIs are supported for 3 years from the date of their first General Availability release.

Learn about Solace's [product lifecycle policy](#), and review milestones and phases from Product Introduction through to End of Support.

Support Response Time for Platinum and Platinum+

Solace Support's highest priority is restoring your service. For Severity 1 and 2 issues, for quickest response, we recommend contacting Solace Support by telephone.

For a Severity 1 issue, emphasis is placed on re-activation of your production system or elimination of the critical impact to your business operations by the fastest means available. Once neutralized, the issue's severity will be reclassified as appropriate to Severity 2, 3 or 4.

You should promptly provide remote access to the affected Solace products and make appropriate resources available to assist with issue investigation and neutralization. Use of a Web collaboration tool between you and Solace Support is an acceptable form of remote access.

Special Considerations for Solace PubSub+ Appliances

Platinum Support

In the event of a hardware failure, a Return Material Authorization (RMA) must be issued by Solace Support before the hardware will be replaced. Solace will supply functionally equivalent or better replacement hardware which may be new or refurbished.

Sparing

Any spares for your Solace PubSub+ appliances or hardware ship the next business day from Ottawa.

Return Shipping

You are responsible for all aspects of returning failed hardware to Solace, including packaging, coordinating shipment and risk of loss. Shipping costs will be covered by Solace.

You must ship the failed hardware to Solace no more than 20 Business Days after you have received its replacement. If you don't ship the hardware back within that time, you will be billed for the replacement at the then-current list price.

If the hardware is defective for reasons other than normal use, including damage in return shipping caused by insufficient packaging, you will be billed for the replacement at the then-current list price. If the hardware is defective due to damage in shipping from Solace, any replacement will be provided free of charge.

Re-location of Appliances

Any damages to an appliance in transit is solely your responsibility.

On-Site Repair

You are responsible for the installation of any replacement Solace PubSub+ hardware.

Platinum+ Support

In the event of a Solace PubSub+ hardware failure, a Return Material Authorization (RMA) must be issued by Solace Support before the hardware will be replaced. Solace will supply functionally equivalent or better replacement hardware which may be new or refurbished.

Sparing

Local sparing of Solace PubSub+ appliances and hardware are part of the Platinum+ Support plan.

Return Shipping

A Solace technician handles all aspects of returning failed hardware to Solace, including packaging, coordinating shipment and risk of loss. Shipping costs will be covered by Solace.

On-Site Repair Service

Solace Support will dispatch a technician to your premises to install replacement hardware once the related support request has been investigated and a hardware repair activity has been deemed necessary. The on-site repair service is limited to replacing failed hardware and does not include installation of additional appliances.

Troubleshooting your site's physical infrastructure, such as power feeds and Ethernet cabling, is your responsibility.

Availability

To ensure availability and timely delivery to your sites of hardware and appliance spares, prior to starting your Platinum+ Support plan you need to discuss site locations and logistics with Solace. Street addresses for all locations covered by your Platinum+ support plan must be identified in writing to Solace in advance of sparing and on-site repair being offered to those locations. Solace may not be able to provide on-site repair to all your locations.

Re-location of Appliances

If you choose to move any of your appliances during the term of your Platinum+ Support, you must provide Solace with at least 45 days' prior written notice of any such move to allow Solace to confirm sparing coverage in the new location and deploy appropriate hardware spare(s). Solace may not be able to provide sparing coverage in each new location. Any damages to an appliance in transit is solely your responsibility.

On-Site Response Time Targets

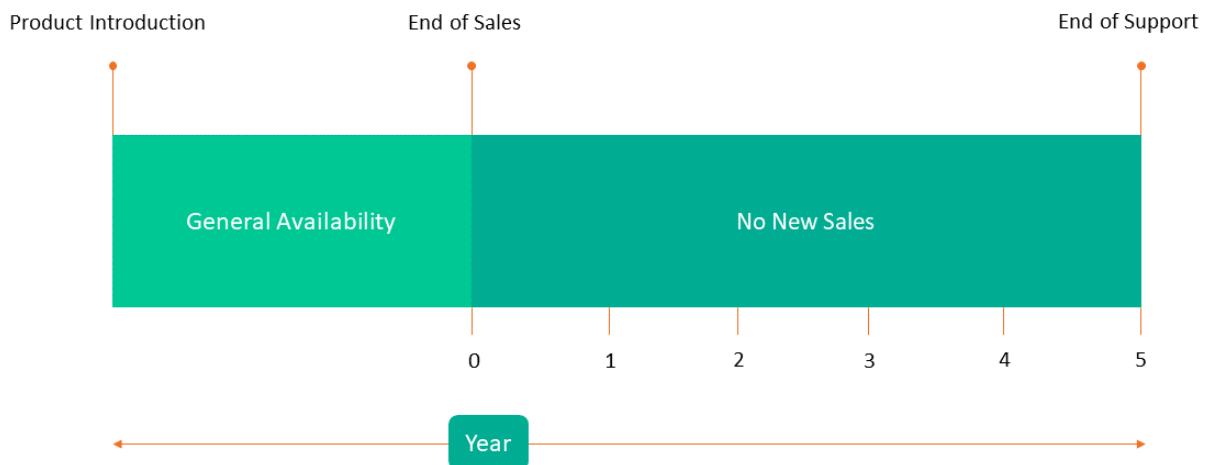

On-Site Response Time targets vary depending on the location of the deployed Solace PubSub+ appliances and the specific components being replaced. Targets will be established on a location-by-location basis prior to starting your plan.

Solace Product Lifecycle Policy

The Solace Product Lifecycle Policy is applicable to all Solace products and allows you to prepare for end-of-life product transitions.

Note, the term of Support for certain versions of SolOS firmware and certain versions of PubSub+ software products follow different timelines than those described below and can be found in the Support section under [“Support Duration for Release Versions”](#).

The diagram below illustrates the Solace product lifecycle:

The following table describes each stage in Solace Product Lifecycle.

Milestone / Phase	Description
Product Introduction	Marks the beginning of the General Availability phase. At this point customers may begin to purchase the product.
General Availability	During this phase customers may purchase the product without restriction. Customers with current support plans will receive Major, Maintenance and Hotfix releases applicable to the product. The General Availability phase typically lasts 3 to 4 years.
End of Sales	Marks the end of the General Availability phase, and the beginning of the No New Sales Phase.
No New Sales	During this phase the product is not generally available for purchase. Customers with current support plans will receive the same level of support as during the General Availability Phase. The No New Sales phase is 5 years long.
End of Support	After 5 years of General Availability, customers will no longer have the option of renewing their support plans, and Solace will cease providing support for the product.

Customer Communication

Formal notifications of a product reaching any product lifecycle milestone will be sent by email to customers on active Support Plans. Contact Solace Support at support@solace.com to be included in these notifications.

Document Revision History

Revision	Date	Description
1.0	2/27/2019	New support document created.
2.0	3/20/2019	Updates for SOL-17207 and SOL-17208.
3.0	04/16/2019	Updated support plans table.
